ABOUT ME

I am a recent BSIT graduate passionate with technologies and solid experience in full-stack web development using PHP, MySQL, JavaScript, and React. During my internship and academic projects, I've contributed to building real-world systems, including content-managed WordPress sites and internal tools. I'm familiar with Linux environments, version control using Git, and enjoy solving problems through clean, maintainable code. I'm eager to grow in a fast-paced engineering team and contribute to building scalable applications.
